

## **Guide to Ordering a Skip**

### **What sizes are available and how do I order?**

We have a range of available sizes which can be reviewed by clicking on the Skips button to the left. If you are unsure and need to talk to an expert then please do not hesitate to contact our friendly, helpful sales team on the number above. Having picked the size you require either call our office on the number above or e-mail us your name and contact telephone and we will call you back and take your order.

### **What size do I need?**

Think carefully about what you have to throw away as getting two skips can be far more expensive than one big one! Use our Skips page to get an idea of the size and capacity of the skips available. All skips must be level loaded so they can be safely transported on the road.

### **Where can the skips be placed?**

Skips cannot be placed on the highway without a permit and correct signage and lights. Please contact us if you cannot place on private land (remember the grass verge outside your house may not be owned by you!) as we can still help you organise this. Alternatively, we may be able to organise a wait and load facility.

### **What access do I need to provide?**

As the vehicles delivering to your house are LGV's and normally very large, please make sure that there is sufficient access to allow it in/out safely. If you are unsure, please contact us and we can provide you with the approximate dimensions required.

### **What can I put in it?**

Skips are for general and inert waste only, no Fridges, no TV's or monitors, hazardous waste which includes paints, solvents, liquids or asbestos. For a full list of things that cannot be put in a skip please contact us or read the Terms page..

### **Is my waste Recycled?**

At Bridge Skips we have invested heavily in recycling and are one of the only local skip companies to own their own Waste Transfer Station. This helps to ensure that your rubbish is processed in as environmentally friendly as possible.

### **Your competitors claim that they can recycle certain percentages.**

At Bridge Skips we do not believe in making sweeping statements such as we recycle large percentages of waste. We ensure that as much of your waste as possible goes for recycling (some types of waste are easier to recycle than others and so it depends on what you are throwing away), and this also helps to keep prices low.

### **Other websites offer to beat any competitors price, why can't you?**

Bridge Skips is a highly competitive company and we believe that price is just one of a number of elements that constitutes value. Others include a friendly reliable service, promptness, flexibility and a keenness to help the environment. Add these factors together and you are getting the best value deal.

### **Other websites offer discount for ordering online, do you?**

At Bridge Skips we believe in permanently competitive prices, regardless of how you book....plus our helpful team are there to advise you on what you need and not just there to take an order. Give us a call and forget online discount. Get permanently low prices here (and they are available to EVERYONE!!)
